

## Aquatic Weed Spraying Notice

Greetings:

It is anticipated that on 6/1/21 and/or 6/2/21, Marine BioChemists will be spraying for aquatic weeds. **Due to a staffing shortage, the spraying might occur over a period of two different dates. If it is necessary for this process to occur over two different dates, additional communication will be shared.**

**For LTEA property owners that use the lakes for their water supply it is important, to not use the water for 3 days, after the date of application. This would apply for drinking water, use of water for irrigation for flowers/gardens/grass or for swimming.**

Additional warnings will be placed near the gates to remind everyone that this is occurring. After the treatment and the 3 day time period, I will remove the notices near the gates. In addition, a notice will be communicated on the Next Door Social Media site.

Should anyone have any questions or concerns, please contact me or any LTEA Board Member. For new property owners, please feel to reach out as you might have some additional questions. My contact information is below.

Thank you,

George Peterson
